3/13/97

Dear Scott,

Hasty thanks for your 3/10 with enclosures on a day the mail is a bit heavy.

Glad to get that Ray stuff. I hear from Jerry that the family has been talking to Oliver Stone and Bill Pepper about a movie.

We are about the same, thanks. I've having some itching the dermatologist believes comes from the many medicines I take.

Glad you like NEVER AGAIN as you do.

Of course when I wrote it I hoped it would appeal to people.

Rae Barrett had graduated Hood College and returned to take her master's degree. She worked for me for a while and was invaluable. I've not heard from her for some time. She returned to Vermont to care for her grandparents.

She was a fine person, too.

She'd been a social worker in a hospital when she went back for her master's degree.

Thanks and best wishes,

Harold
